

## Holding Gasoline Prices Down

"The Federal Trade Commission in report to Congress ascribes strong demand as primary cause of recent advances in price of gasoline and other petroleum products, rather than to any combination in restraint of trade." (Boston News Bureau, June 3rd, 1920.)

Gasoline prices will go down as soon as gasoline supply exceeds demand.

Only two ways are known to increase gasoline supply. First, increase the production of crude petroleum; second, to increase the yield of gasoline from the crude petroleum obtainable.

Recognizing the latter as the more practical method, the Standard Oil Company (Indiana) has discovered, through extensive research, a way to definitely increase the yield of gasoline from crude oil.

In its laboratories, modern to the last detail of equipment, chemists, engineers and experienced refiners are working continually to this end.

It was one of these men who discovered the process which has largely increased the yield of gasoline obtainable from the crude.

This, and other discoveries, together with the economies of efficiency throughout all processes of refining, have enabled the Standard Oil Company (Indiana) to exert a marked downward pressure on gasoline prices.

The Standard Oil Company (Indiana) strives at all times to deal in fairness to all the people within its territory, and today is operating its business on as small a margin of profit as is consistent with sound financing, and with safety for its 4799 stockholders, of whom no single investor owns as much as 10 per cent of the total stock.

### THE WRONG TIME

In a town in the western part of the state some time ago occurred a fire at about 2 a. m. In this town lives an old man. The usual noise in-

cident to a fire in small towns awakened the old man and he rushed into the street and accosted a passerby with the exclamation, "This is a helluva time o' night to have a fire." The ridiculousness of the exclamation struck the passerby and for a long time after the fire was the source of considerable levity on the part of the townspeople. But that is not the point we want to bring out. The point is that a defective flue, a trash or rubbish pile, an improperly insulated electric wire, a cigar or cigarette stub, a wooden spit-box, in fact none of the usual sources of fires are respecters of hours. They work all the time, but more often their demonstrations are at "a helluva time o' night."—Kansas Bulletin.

### ADVERTISE AND KEEP ALIVE

Do you load it at the muzzle?  
When you want a shot or two?  
Do you wind it with a watch key?  
Like your father used to do?  
How'd you like to hop a horse car?  
Like you did long years ago?  
Don't an auto beat an ox cart?  
Well I rather reckon so.  
Do you argue than an hour glass?  
Beats a Waltham all to smash?  
Do you use the same old system?  
Keepin' books and countin' cash?  
Do you trim a goose quill neatly?  
When you want the ink to flow?  
Don't you think there's been improvement?

In the last decade or so?  
Tell us are you advertising?  
In the same old foolish way?  
That your granddad did before you?  
And persist, "It doesn't pay?"  
Think the whole world knows your address?  
"Cause it hasn't changed in years?"  
Wouldn't the pathos of such logic  
Drive a billy goat to tears?  
Just a card is all you care for?  
Hidden, lonesome and unread,  
Like the sign upon the tombstone,  
Telling folks that you are dead.  
Wake up, and take a tonic,  
Bunch your hits and make a drive!  
Run a page and change your copy,  
Advertise and keep alive!  
—Endeavor.

## PROBLEMS FACING STRICKEN WORLD

Shall Chaos or Reconstruction in  
Europe Follow the Great  
World War?

### BOLSHEVIST SEEDS OF POISON

Avowed Object of the Leaders of the  
Movement is to Stir Up Hatred  
of Law and Order Every-  
where.

#### Article XXVIII.

By FRANK COMERFORD.

"The program of the communist party (bolsheviks) is the program not only of the liberation of the proletariat of one country. It is the program of the liberation of the proletariat of all countries; it is the program of international revolution. The overthrow of imperialist governments by means of armed revolt is the road to the international dictatorship of the working class." In these words, Bucharin, accredited and recognized bolshevik propagandist, set forth the object of the communists at Moscow in 1918.

Lenine, in the same year, in Petrograd, declared "that the chief task which we set ourselves at the very beginning of the war was to turn the imperialistic war into a civil war." His aim was to force upon Russia Communism, and to summon the discontented of the world to rise in revolution against their governments. All existing governments were vile, lenine said, and they must be overthrown. Political action, parliamentary methods, peaceful voting, were worse than useless. They were inventions of the devil, Capitalism. Force must be used; the workers must arm themselves and fight; the world could not come to the light of freedom and justice except through blood. Lenine was for the great "red baptism." It alone could cleanse the world and make it a decent place in which to live. He wrote the aim and object of bolshevism into the soviet constitution when he defined the fundamental problem as being the "dictatorship of socialism in all lands." He denounced the war cry on the coast of arms of the bolshevik government in these words: "Workers of the World, Unite."

The bolshevik government has been insistent and persistent in its propaganda, collecting and pointing out the causes for discontent in other lands. It has been a propaganda of hate. It has scattered, broadcast, poison seeds in the soil of unrest. It has played to class feeling. It has appealed to the lowest and worst in men. It has written and spoken of the "Great War" as the enterprise of capital. It has charged upon the terrible shedding of blood to capitalist imperialism. It has listed the ill-effects of the war and charged them not to the war, but to Capitalism. It has pointed to the poverty and disorganization of the world, directly caused by the war, and attributed all of these unhappy results of a four year struggle with anarchy, not to the war but to the system of so-called "Bourgeois Government." It has enticed, magnified and intensified unrest. It hopes to bring about a great world foment which will destroy all government except the government of the proletariat, the soviet plan. Its propaganda has caused many of the people of the world to think that they are still fighting the regimes of the czars, and that reactionary governments everywhere are conspiring to bring about their downfall and re-establish the reign and rule of despots in Russia. It does not make conspicuous the fact that the czar is dead and that his regime has passed forever.

#### Lenine Without Tolerance.

Lenine decries anyone and every one who does not accept his gospel of world revolution. He is particularly bitter towards socialists who are opposed to his program. Writing of "the military program of the proletariat revolution" he concludes his article in the November "Class Struggle" for 1919: "Whoever, in view of this last war, is not willing to carry out this demand, let him be good enough to refrain from uttering large words about the international revolutionary democracy, about the social revolution and about the war against wars."

Of those who have dared to denounce militarism and demand disarmament Lenine has written: "What will the proletariat women do to prevent this? Merely denounce all wars and militarism? Merely demand disarmament? Never shall the women of an oppressed and revolutionary class resign themselves to so despicable a role. On the contrary, they will say to their sons: 'You will soon be grown up. You will have a gun. Take it and learn how to use it—not in order to fight your brothers, as is the practice in this war of plunder, but in order to fight the bourgeois of your "own" country; in order to put an end to misery and wars, not by means of "kind wishes," but by overthrowing and disarming the bourgeoisie.'"

The third "International" was called together to organize the movement against the peace of the world. It met at Moscow from March 2 to March 6, 1919; it adopted a "manifesto" which was signed by Lenine and Trotsky, the leading spirits of the congress of the communist international.

This "Manifesto" has been sent all over the world. It makes no bones about the plan of the bolsheviks to incite the world to disorder. On the contrary, it boasts that this is its mission. Under the caption "The Way to Victory" the manifesto declares:

"The revolutionary era compels the proletariat to make use of the means of battle which will concentrate its entire energies, namely, mass action with its logical resultant, direct conflict with the governmental machinery in open combat. All other methods such as revolutionary use of bourgeois parliamentarism, will be of only secondary significance."

The "manifesto" further proclaims the "First International" foresaw the future development and pointed the way; the "Second International" gathered together and organized the proletariat; the "Third International" is the international of open mass action of the revolution, the international of deeds. The work of the "Third International" is mapped out in the "Manifesto" in these words:

"The task of the international communist party is now to overthrow this order (present governments) and to erect in its place the structure of the socialist world order. We urge the working men and women of all countries to unite under the communist banner, the emblem under which the first great victories have already been won."

"Proletarians of all lands! In the war against imperialistic barbarity against monarchy, against the privileged classes, against the bourgeois state and bourgeois property, against all forms and varieties of social and national oppression—UNITE!"

#### All Urged to Unite.

"Under the standard of the Workingmen's Councils, under the banner of the Third International, in the revolutionary struggle for power and the dictatorship of the proletariat, proletarians of all countries, UNITE!"

I have quoted these excerpts from an edition of the "Manifesto" printed in Chicago. The copy in my possession contains the name and address of the printing company. There is an introduction to this document. It is unsigned. A few extracts from this introduction are important. Commenting on the "Manifesto," the introduction says: "It will soon become the basis of international working class action, and will become the lightning that will rend the clouds and fogs that now envelop the workers of the world."

"Comment on this manifesto would be useless, superfluous. Its magnificent language speaks the message a suffering world is eagerly waiting to hear."

"It will assist the socialist movement everywhere into the path of uncompromising, revolutionary action that alone can usher in the triumph of International Socialism."

If the publication of this manifesto and the introductory comment to it is not treason, then Benedict Arnold was a patriot. It is a conspiracy against the peace, health and happiness, as well as the lives and property the liberty and security, of every man, woman and child in the United States. It is a call to lawlessness, organized crime. It might be well for the people to give less time and thought to partisan political wrangling and set themselves to silencing sedition. It should be an easy matter to discover the author of this un-American, inhuman and criminal foreword to the "Manifesto." The publishers and distributors should be brought to the bar and made answer. Let us kill this menace by destroying the seed. If we do, we will save ourselves much trouble later. By such a course we will allay unrest.

Lenine has repeatedly said and written that the bolshevik government cannot last in Russia alongside of the present governments of the world. In other words, bolshevism cannot live in a world of democracy. The greater truth is that democracy cannot live in the same world with bolshevism. Bolshevism in theory is based on the ideal of socialism, communism; in methods of the bolshevism of Lenine is less violence, supreme autocracy.

#### Ellen Richards, Chemist.

Intuition is the headlight put in woman's forehead uniquely for her when woman lost common sense in Eden. Just a few females have been able to clutch at the skirts of common sense, and to retain its hard pan usefulness. These have plunged into hard pan studies, and in the crucible have evolved some good things for the world. Among the number stands Ellen H. S. Richards, chemist, born in 1842, died in 1911, a skilled instructor in the Massachusetts Institute of Technology. Not only was Ellen Richards a chemist, but she was a pure food expert. Her books and pamphlets are valuable. Among their titles are these: "The Chemistry of Cooking," "Conservation by Sanitation," "The Cost of Cleanliness," and "Home Economics." All honor to you, Ellen Richards, who pursued the hard paths of practical output unadorned by the Jessamines of romance.

#### Honey Yields Higher.

The average yield of surplus honey in 1919 was 50 pounds to a colony of honey bees, as estimated by the bureau of crop estimates, United States department of agriculture. This is considerably above the average of 45 pounds in 1918, and of 41.6 pounds for the five years 1913-1917. The relative proportions in which the honey of the last two years was marked are indicated by 59 for extracted honey, 31 for comb honey, and 10 for bulk honey. About one-third of the product goes to "outside" markets.

## HISTORY OF MENDENHALL'S NUMBER 40 FOR THE BLOOD

Forty years ago an old doctor was putting up a medicine for diseases of the blood that cured the worst cases and time proved that the cures were permanent. After many years I secured the prescription, being a druggist, and took each ingredient separately and referred to my U. S. Dispensary and other authoritative books on medicine and found the medicinal properties set down as follows: "A specific in its influence upon all glandular structures of whatever character, it is also a blood making remedy of great power. Acts directly upon the skin and is indicated in eczema, itching, sores, ulcers, pimples and skin eruptions of whatever character. Employed in chronic rheumatism, catarrh, constipation, stomach, kidney and

liver trouble. Under its use scrofulous swellings and bodily eruptions that have withstood all other treatment disappear as if by magic." To commemorate my fortieth year as a druggist, I named this medicine Number 40 For The Blood. J. C. Mendenhall, Evansville, Ind., 40 years a druggist, Frank Stacer, prominent farmer, Newburg, Ind., makes the following statement: "I suffered with rheumatism for several years. Tried numerous remedies with little or no benefit. Number 40 For The Blood was recommended to me and I improved from that time I began taking it. I have taken in all six bottles and feel that I am entirely well, as I have had no symptoms of the disease for two years."

SOLD BY E. M. LAAKMAN.

### FOR THE CANNERS

If you have any cans left unfilled by this time in the summer, why not put up some spring chicken fried. There is nothing better for an emergency shelf than some cans of fried chicken, and it is really no trick to have them if you are clearing out the young chickens for your winter flock.

After cleaning and preparing spring fies, season and fry as though for serving directly on the table. Cook until the meat is about three-fourths done. Pack into jars while hot, pour the liquid from the frying pan over the meat. Adjust the covers as for any cold pack canning and sterilize one hour and a half in water bath, or thirty minutes under ten pounds steam pressure. It is not necessary that the meat be covered with liquid. Some people prefer to make a thin gravy and pour over the meat in which case it is better to sterilize two hours.

#### General Rules for Frozen Sweets.

The proportion of sugar and flavoring is twice that used for puddings. Sugar and water used for ices is made into syrup.

Mash all fruits and put through a sieve. Lumps become ice when frozen. Sealed milk and cream give solid smoothness.

Add whipped cream to a half frozen mixture and finish freezing to make a light, feathery mass.

When all materials are cold, acid fruit juices do not curdle milk.

Lemon juice helps bring out the flavor of any fruit.

Turn crank slowly for smooth mixtures, increasing speed as mixture becomes harder.

Turn rapidly for a light, fluffy ice or sherbet.

#### Mixed Vegetables

While in the art of vegetable canning, do not neglect to put up some jars of mixed vegetables. Then, next winter, when a soup bone is simmering on the back of the stove, all that will be needed for a first class vegetable soup will be to open one of these jars. Or, if you are late getting home from club, or town, a cream soup will be ready in a few minutes.

You may have as many as six kinds of vegetables in one jar, the number being limited only by the kinds which go well together or the state of your garden.

#### The Cool Cucumber

Fresh cucumbers have a bad reputation for being more or less indigestible—a reputation they do not really deserve. Nine-tenths of the digestive disturbances caused by cucumbers are due to two things which are easily corrected if one enjoys the cooling cucumber enough to make the effort. The first cause is the mistaken idea that cucumbers must be soaked in cold salt water before they are served, and second, they are not chewed well.

Salt, not only toughens the cucumber, but also wastes its most valuable content—mineral water. To let sliced cucumbers stand in water, wastes that tasty and valuable element. If desired to have the cucumber cold, let it stand, unpared, in cold water or under a faucet, and prepare for the table at the last minute.

Miss Mary E. Robinson, Clothing Specialist, from the Extension Department, will be in the county the

week of August 16th, to take up work in several communities, with the Home Demonstration Agent. All-day meetings are planned for three communities, Unity, Fairview and Jay Dee. Leadwood and Desloge will have afternoon meetings.

### SIDE-LIGHTS OF SCIENCE

There is no white pigment in any white flower or in white hair, and probably not in white bark. The white color of the lily is due to the presence of innumerable air bubbles and the same is true of white hair. In order that hair may turn white in a single night, it is not necessary for the original pigment to disappear and for white pigment to develop. It is only necessary for a mass of minute air bubbles to be formed in the hair as a result of worry. While this accounts for the physical change, we are as much at a loss as ever to know why intense grief should develop air bubbles in the hair.

Lignite, or "brown coal" of Texas, North Dakota and other Western states, probably will be used extensively as fuel if experiments soon to be made by the bureau of mines, in an effort to drive off the moisture which makes it unserviceable, prove successful. Initial experiments will be conducted at New Salem, N. D. Congress has appropriated \$100,000 for the work. Lignites constitute one-third of the fuel resources of the United States, but have been little used because of the great amount of moisture in them, their tendency to disintegrate when dry and their liability to spontaneous combustion. Bureau of mines experts believe it not only will be possible to carbonize the lignites into superior brand of fuel but think it possible to make valuable byproducts, such as gas, oil and tars.

There is little wonder that some native tribes worship the coconut tree as a symbol of divinity. This magic tree furnishes its happy owner with food, wine, milk, oil, vinegar, light, timber, and fiber, according to the Scientific American. In addition to the kernel of the coconut, the husk, coconut butter and palm sap or toddy, the coconut yields no less than eighty-four different products of value. These parts of the tree which are utilized are the meat, husk and oil of the coconut, the shell, the fiber, the stem, the bark, leaves, young nut, green husk and early shoots of the seedlings. From a coconut tree the owner can build his own home, ornament it, light, build a boat, feed himself and his cattle, sheep or poultry, fertilize his land, manufacture his own soap, protect himself with a gas mask, supply himself with succulent vegetables, preserves, pickles, prepare a delicious "toddy" and keep a supply of sugar on his coconut wood shelves.
